

## **Data Management Plan**

Data will be reported in a timely fashion to The Biological and Chemical Oceanography Data Management Office (BCO-DMO; <http://www.bco-dmo.org>) according to the international GEOTRACES and NSF data policy. This will include the processed  $^7\text{Be}$  data as well as all the supporting documentation (metadata). Anticipated data will include measurements of  $^7\text{Be}$  in the water column, aerosols, and suspended particulates. In addition, significant findings will be promptly submitted for publication, with authorship that accurately reflects the contributions of those involved.
